WORK PLACEMENT EVALUATION OF:

Would you please note any comment or remark about the student's achievements and the qualities and skills he displayed (quality of work, knowledge of work, initiative, autonomy, creativity, language, principal strengths, interpersonal skills, areas which needed improvement ...)

Internship evaluation for Cédric Honnet

Cédric has performed extremely well in his internship assignment at Sigma Designs. The problem domain was video codecs, which has a steep learning curve prior to actual productivity. That coupled with the challenges of setting up in a new city and absorbing the methods and tools at a new workplace, make the task quite daunting. With his keenness to learn new concepts from first principles and initiative to overcome the typical road blocks, Cédric was able to accomplish his task fairly autonomously and to the satisfaction of the team. The project involved working with a customizable processor and it breaks new ground at Sigma Designs. Cédric had the curiosity to ask pertinent questions along with the sharp ability to grasp new concepts and also put in the hard work necessary to achieve his tasks in an excellent manner.

Cédric has a friendly and pleasant disposition and quickly became part of the work culture. His abilities, technical and otherwise, would make him an asset for any organization. It was a pleasure to work with him.

Global mark: A

Please use this scale of notation with the 5 level of appreciation for the global 'mark':

SATISFACTION			DISSATISFACTION	
A	B	C	D	E

The following marks are awarded to students at Télécom ParisTech : A = Total satisfaction, B = Clear satisfaction, C = Slight satisfaction, D = Slight dissatisfaction, E = Absolute Dissatisfaction.
